

Optimal Technologies International Inc. is expanding to become the leader in innovative grid optimization and building automation technologies. Optimal Technologies (US) Inc., a subsidiary of Optimal Technologies International Inc., is seeking experienced professionals with exceptional backgrounds in the design, and implementation of complex optimization, software and hardware systems.

This is an opportunity to be a part of a world-class team in an exciting and extraordinary time of Optimal's growth.

Position: **Software Developer, AskOT User Interface**

This is a salaried full time position.

Responsibilities: Responsible for implementation of components of the AskOT user interface.

- Work closely with the UI designer and the senior developers to complete and deliver the AskOT UI applications on time.
- Take full responsibility of the assigned tasks; understand and transform the UI design specification into implementation requirements and then implement them into working modules.
- Research, explore and recommend better components or modules for implementing the tasks.
- Follow company's coding standard and maintain a high code quality.
- Involve in UI testing and bug fixes to assure that the implementation of the assigned tasks meet the specification.
- Keep up to date with the latest technologies.

Location: Research Triangle Park Area, North Carolina

Compensation: Excellent compensation and benefit plan including participation in bonus, stock option, and stock ownership plans. Compensation is based on experience and performance.

Minimum Qualifications:

- A bachelor's degree in Computer Engineering or Computer Science or equivalent.
- A minimum of 3 year of user interface development experience.
- Proficiency in user interface development tools or languages such as Adobe Flex/Flash, XML, Ajax, JSP, Javascript.
- Good communication skills and fluent in English.
- Upbeat and flexible attitude; consistent enthusiasm for working in a fast-paced company.
- Good team player capable of doing independent research into topics when required.

- Strong willingness to learn new technologies and techniques.
